(*Hylocereus megalanthus*.)

- Juicy, sweet and citric, tamarillo or tree tomato is a small oval-shaped fruit. It is closely related to other Solanaceae family of vegetables and fruits such as tomato, eggplant, tomatillo, groundcherry, and chili peppers. Tree tomatoes are thought to originated in the semitropical high altitude Andes forests of Brazil and Peru.

● Tomate de Arbol "Tree Tomato" or
Tamarrillo, (*Solanum betaceum*)

- The Babaco fruit is torpedo shaped with five deep longitudinal furrows that resemble the shape of a star. The fruit's skin is smooth and thin and when fully ripe will turn golden yellow in color. Its flesh is cotton-white, seedless, succulent and melon-like in consistency with overt effervescent qualities. Babaco fruit allures with aromatics that distribute volatile compounds, these compounds directly influence the flavors of the fruit. Babaco's flavors are layered with tropical and sub acidic notes of pineapple, kiwi and its parent fruit, papaya.

● Babaco (*Carica pentagona*)
